

THE NEXT REVOLUTION IN ANILOX INSPECTION

WELCOME TO A NEW ERA IN ANILOX QUALITY

Track & Analyze Data Across Multiple Locations

Track & analyze volume measurements, roll history, performance trends, inventory databases, and Veritas usage across all locations in one unified platform.

Intelligent Optimization

Set up important performance alerts, standardize volume thresholds, and optimize cleaning, maintenance and inventory with data confidence.

Cloud Visibility Across Teams

Share data instantly and keep measurement data accessible at the fingertips of production, management and support staff, via web platform and mobile app.

Supplier Collaboration

Enables seamless collaboration between printers and key suppliers to analyze and optimize their anilox performance.

INTRODUCING MIRA

MAKING INTELLIGENCE REAL & ACTIONABLE

MIRA is a secure, cloud-based intelligence engine that facilitates access, analytics and decision making on anilox data for Veritas users, across multiple locations worldwide.

Unified Measurement Data
MIRA connects printers and suppliers on one intelligent platform, enabling clear communication and shared analysis of anilox data

Proactive Customer Support
Printers can set up supplier alerts and automated communications to notify suppliers of immediate or upcoming roll service and support.

Accuracy You Can Trust
Confidently resolve issues faster with accurate anilox data that drives accountability, seamless collaboration, and stronger customer partnerships.

MicroDynamics

ROBOTICS

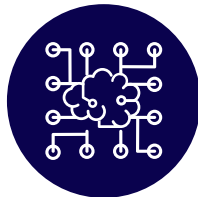

**POWERING A
NEW WAVE OF
AUTOMATION**

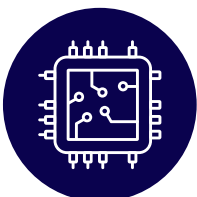

MIRA Robotics is an automation solution for robotic measurement, powered by MIRA

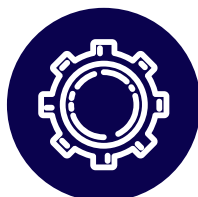

**100% Machine
Controlled Operations**

**True, In-Process
Measurements**

**Flexible, powerful
API connection**

**Integrate into a
Variety of Machines**

MIRA Robotics enables fully autonomous operation of Veritas™ inspection systems through a powerful, yet flexible, API integration, unlocking true in-process measurement.

By integrating directly into presses, cleaners, and a wide variety of equipment, MIRA Robotics brings the power of Veritas measurement while eliminating the need for human control.

MIRA ROBOTICS IS CURRENTLY INTEGRATED ON:

*BW Converting's PCMC Meridian Elite+ laser anilox cleaner
TWEN's TAC_M_Micro laser anilox cleaner*
